

GSA Fleet - Telematics

Telematics refers to technology-based hardware tools to collect, record, and transmit vehicle operational data. The devices plug into the vehicle's onboard dashboard computer and record, store, and report data directly from the vehicle to various web-based reporting platforms. The data provided can be used to help you manage your fleet at maximum efficiency.

GSA Fleet has offered telematic devices as optional aftermarket equipment for all leased vehicles since 2007. Recently, we leveraged our purchasing power and updated our offerings by awarding a new government-wide Blanket Purchase Agreement (BPA) that provides federal agencies with the latest in telematics technology at competitive prices. This new offering will assist Federal agencies with meeting the sustainability mandates outlined in Executive Order(EO)13693 - Planning for Federal Sustainability in the Next Decade. The BPA was awarded to AT&T Mobility, Inc. on September 30, 2015 and is open to all federal agencies for both GSA Fleet purchasing and leasing customers.

The new BPA with AT&T Mobility, Inc. offers two categories of telematics: GPS Tracking Only and GPS Tracking with Vehicle Diagnostics. The GPS Tracking Only option is ideal for medium

Executive Order 13693 Reporting Requirement	GPS Tracking Only	GPS Tracking & Vehicle Diagnostics
Speed	X	X
Location data	X	X
Idling	X	X
Utilization	X	X
Maintenance		X
Fuel consumption		X
Emissions (varies by year, manufacturer, make & model)		X

duty vehicles. The GPS Tracking combined with Vehicle Diagnostics will help agencies meet the mandates set forth in the new EO. The table on the left indicates, by category, reporting data capabilities available.

Agencies can place orders through the BPA, directly with AT&T Mobility, Inc. The rates listed in the table below have been pre-negotiated to allow for a simple, streamlined, ordering process.

The order form is downloadable from www.gsa.gov/fleetsolutions.

Aftermarket Telematic Device/Plan BPA number: GS-30F-CA051	GPS Tracking Only	GPS Tracking & Vehicle Diagnostics
Device (per unit)	\$100.00	\$100.00
Installation (per unit)	\$46.55	\$46.55
Data Plan & Web Access (per month)	\$10.00	\$12.00
Total Costs (Year 1)	\$266.55	\$290.55

In addition to the aftermarket option, GSA Fleet 2016 vehicle offerings include telematics as an additional factory installed equipment on some new vehicles. Pricing and availability for a variety of makes and models will be provided as vehicle line items become available in AutoChoice.

If you are ready to start acquiring telematics through GSA or need more information, please visit: www.gsa.gov/fleetsolutions or email the Fleet Solutions team at fleetsolutions@gsa.gov.

Right Vehicle, Right Price, Great Service
